ITEM CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

**TO ALL WATER USERS FILING SUPPLEMENTAL STATEMENTS
OF WATER DIVERSION AND USE**

Enclosed is your Supplemental Statement of Water Diversion and Use (Statement) Form (WR 40-1) for years 1995, 1996, and 1997. All Statements should be completed and postmarked no later than June 30, 1998 for delivery to the State Water Resources Control Board (SWRCB). If you do not file a Statement for six consecutive years, your use will be considered inactive and the SWRCB will no longer mail you Statements to record your diversion and use of water. If you wish to reactivate an inactive Statement, please contact our office.

We have converted to a new database system to maintain water right information from your Statement forms. We ask for your assistance in correcting any errors that may be shown on the attached Statement. Please review the information in the upper half of the Statement and make any corrections or additions that may be needed, in red; (e.g., corrections to current ownership, address, phone number, agent, etc.).

Since a Statement is required for each point of diversion, please complete the enclosed Statement(s), to the best of your knowledge, for the point of diversion identified on the form. If the location of the existing point of diversion has changed, please identify the new location. However, if you have developed a new point of diversion, in addition to the existing point of diversion, please contact us and we will supply you with a separate form to record the new diversion.

Please return the form to the SWRCB postmarked on or before June 30, 1998. Please contact Koso Nodohara of this office at (916) 657-1872 if you have any questions or need assistance.
